## God's Message

My Loved Ones,

Look for me inside yourself and you will find my strength resides in you.

I live in everything and I am everything. My light shines everywhere in everything and everybody. You are created by my image with all my qualities. You are created, you can create and you will create.

Don't look for me outside yourself, but see me in everything and everybody.

I connect in a way that fits to you personally. I speak to everybody and it's up to you to listen. You can hear me in a breeze, as a voice, as a silence, in your sleep. My connection with you is personal. Trust will bring you to me. Believe I am here and your way will open to you. The truth always reveals.

Come my beloved ones, open your heart to discover the truth just like the ones who went ahead, don't be afraid. It is your right.

Let me lead you to The Kingdom of my light, because light is what you truly are.

I will not take your problems away, because then you will not learn to use the power that's in you. But I can help you by opening the doors so that you can solve them in time.

I am the light, I am your light. You are me and I am you. Together we are in eternity!

*GOD – the Omnipresence*

## Isaia's Preface

### Philosophy of Isaia

Isaia views God as a pure clear light that represents Universal Intelligent Energy and permeates everything. According to Isaia this Universal Intelligent Energy possesses a power, wisdom and love that only works from unconditional love. Humanity is able to tap into this source of energy by acting out of compassion and growing towards unconditional love. It is a learning process for humanity to look past differences on Earth (the illusion) and to accept each other as true brothers and sisters, so that a unity is formed in which people are responsible for each other and life on Earth. This is the way to Enlightenment, the way of the Messiah. The way to deep peace on Earth. This is Isaia – Enlightened by God.

Isaia is the name given to Sathanama to spread this scripture. Isaia means Enlightened by God, the Messiah or the prophet. The message of Isaia is that everyone can achieve the state of Enlightenment like Jesus and others have. Each is His own Prophet. God gives each human being the same power and the light to discover that. By placing someone else on a pedestal you disempower yourself, creating a gap in your own growth. But respecting and cherishing the ones who went ahead will assist you on your path to enlightenment. Realize that God makes no distinction in what He gives to whom. That is your own responsibility.

The state of Enlightenment has to do with 'again' accepting God in yourself. Isaia's goal is to awaken humanity in their God-Being and purify the name God to its deepest core, so that God

will be recognized as the Purest essence and people will ascend from the illusion.

Through experiencing God-Being in yourself all dogmatic faith will be transcended.

Isaia's intention is not to convince anyone of anything, but to open up the possibility to experience it for oneself. Isaia brings and represents this Purity of God in every form possible, and is for everyone regardless of conviction or background.

Advice: The information in this scripture will integrate better by reading it slowly.

## **The Realization**

*God*

***I am the Purest Essence with the Highest Intelligence. I created the All. All exists and lives in Me and is My Form in expression.***

God is the purest essence with the highest intelligence. All exists and is in God. God created the All. God lives in everything, because it is His form expressed. People, animals and nature are an expression of God. In creation Will arose as well. The Will created an illusionary consciousness in God. The state of Clear Higher Consciousness, God, is attainable from Will. In each form the Purest essence God is present. And each form is also the Purest essence God, whether encased by an illusionary consciousness or not. This illusionary consciousness is to be thoroughly understood from Will, because only the Purest essence God exists.

There is no gender to God, but in common language as it is today we will speak about Him.

*[Nothing higher than God exists. God is the purest kind of vibration. God's energy permeates all there is. God created the All. The All is everything without limitation, that is, infinite. In the creation Will arose as well. Will offers consciousness a choice and because the Soul is God's creation, the Soul has a Choice. From this choice the Illusionary World arose. The Illusionary World is the world of Duality (see "The Illusion") in which humanity is tested in God's Love. The test is the choice between Fear and Love. The opposite and duality of Love that one needs understand is Fear. By understanding Fear, and therefore the illusion, from the Will, God's kingdom is attainable]*

*God Consciousness*

*My consciousness is the purest consciousness of unconditional love. One day you will realize that you too consist only of God Consciousness.*

In this Unconditional Love you can walk your path and discover my power and know that one day you will step out of the illusion.

God Consciousness is a state of consciousness that represents the purity of God, that is Unconditional Love. God Consciousness knows no judgment and accepts everything as it is through the unconditionality. This means that God is unable to judge. God sees only pure light in all there is. In this unconditionality the soul walks its path to discover God's force. God Consciousness in its purest form can be found in Mother Earth. Mother Earth can be regarded as the female aspect of God, if we would divide God with respect to gender. In all her unconditionality she serves the learning process in the Illusionary World and perhaps belongs to the illusion herself.

*[Unconditional Love is the love that knows no boundaries. No matter what happens, I love you. God loves us unconditionally and leaves it up to us to make our choices and walk the path. It is our choice whether we will live from God Consciousness or not. It is our choice to remain in the illusion or not. But if you want to know real love, then open your heart for God Consciousness. ]*

*God as Male and Female*  
***Like Me, you are both Male and Female in perfect balance.***

You were made in My Image, carrying the perfect balance of Male/Female inside of you, a perfect balance of Power and Love in unconditionality. The creation of that illusion and duality gave birth to a physical separation of Male and Female that created a division.

From inside the illusion in which time is a reality the following applies:

**Past:** In the past the energy of power strongly dominated and manifested itself to a greater degree in the Masculine, causing the Feminine, carrying the energy of Love, to be suppressed. The Feminine was rendered powerless and could not express her love of God.

**Present:** Now is the time that the energy of Love, the Feminine aspect of God, integrates into life on Earth. This means that the imbalance will persist for a while longer, because the Masculine will now discover love, but first will discover it in himself. For the Feminine this entails that she too needs to stand on her own, because the Masculine is not yet ready to share this love and responsibility. This in turn is advantageous for the Feminine, not to look for her savior, but to also learn that she embodies both forces and does not become dependent.

**Future:** Masculine and Feminine have found each other in perfect balance. In the creation they can therefore coexist in Love and truly create Heaven on Earth.

The group consciousness plays the biggest role in creating Heaven on Earth. In the group consciousness is what we are all creating. The more people that live in a higher state of consciousness, the greater the chance that Heaven on Earth will be a fact. In the creation of awareness it will be therefore necessary to be of service until everyone is in the Light of God.

*The Light*

*Even though you live in the shadow of your own darkness, I  
only see the Light in you.*

God is Pure light. Light is the Purest that exists. In light the deepest peace is expressed. Light is without emotion and therefore without love. Light is the Purity to which every soul consciously or unconsciously moves to. Think of a seed that grows from the darkness in the earth towards the light. The expression 'where there is light there can be no darkness' fully applies. Where there is Light, so the purest essence God, there is no room for darkness, the Illusionary World. To experience the Purest Essence God, one should accept the Light in everything and everyone, and thereby break the illusion.

*[God sees only Light. And since you were made in the image of God, you too are able to see only Light, if you break out of the illusion. Everyone is created according to the perfection of God, which means that each is actually Light, whether or not encased in their illusion. When you are Light you radiate Light where there is darkness and will realize that everyone is Light.]*

*The Illusion*

**Illusion is not who I am, nor who You are!**

The Illusionary World is the world where duality exists. Duality is an opposite. The ego is the consciousness of the duality and opposes God Consciousness. The ego is very intelligent and is not to be underestimated. The ego can be seen as a teacher that makes you conscious of the duality. In any case, everything that is not in unconditional love is part of the illusion. It is this illusion one needs to break through to enter the Kingdom of God.

*[Duality means opposition. In the duality an opposite to Light has been created, namely the dark or darkness. The dark is kept alive by the Ego. By treating the ego with love and transmuting everything it tries to create, such as fear or negativity, into love, it is rendered powerless.]*

In the creation Karma arose. By awareness of the influence of karma in your life and by creating good karma, one breaks through the illusion to the Kingdom of God.

*[Karma, meaning cause and effect, helps people on their way to God Consciousness, but karma itself is not part of God Consciousness.*

*It is part of the illusion that enables one can make a distinction between good and evil and becomes aware that everything you do has a consequence]*

*Love – the Way*

**The Soul is our Vessel, Love our Way, and Light our  
Destination.**

The Way that the Soul travels to the Light is Love. Love in this sense is an emotion that represents a warm connectedness. God Consciousness is unconditional Love. This consciousness is the way to the Purest Essence God and from the consciousness currently present on earth it will follow the path of forgiveness to compassion, to flourish in unconditional love into God Consciousness.

*[God's Love in which we live is unconditional and is attainable for everyone. In fact, everyone is connected to it, though some a little more strongly than others. You yourself are responsible for allowing unconditional love into your life, so that you become who you truly are. The path of love is devoid of struggle and conquers fear.]*

*Enlightenment*

**Enlightenment is a state of Being in which you experience  
Deep Peace and Unconditional Love wherever you are.**

*Service*

**I am of Service in My entire Creation.**

You were made in My Image and on your journey to your growth from the illusion you will naturally become a servant to Me and from there to Your Self and the Creation, because that is My Will in expression.

Whoever finds in himself the Purity of God will live in eternity.

*[God is of service to everything and everyone. He will send assistance, the God Force, in response to every call for help. The God Force consists of Angels, Elohim, Deva's, Ascended Masters, Goddesses, guides, etcetera. The kind of assistance depends on your level of development, but He connects everyone with the Angels. By serving God the Purity of God is expressed in everything.]*

## *Sacred Sites*

There are many sacred sites on Earth. A sacred site is a place where the force of God is enhanced, often by an enlightened being. Visit these places when you feel the need to. Besides these sacred sites one can create a sacred site of their own, such as an altar.

## *Altar*

An altar is a sacred place where you can pray and meditate. God lives everywhere, so in your house too. You do not need to visit a special place to find God, but by coming together with people to pray and meditate, the group consciousness is enhanced. When you have the opportunity, try and gather with others.

## *Religion and Worship of God with Isaia*

According to Isaia the time has come for people to accept God in His Wholeness as all that Truly exists, and to no longer differentiate in any way. Isaia respects every religion in its core as an expression of the Pure Essence God.

Each faith brings in its own way a power, discipline and love in the many faces of God, just like the many faces of God express themselves in the diversity of human being. This diversity encompasses all expressions of the Illusionary World, and in it lies the power of God in Human Being to use Will to break through this illusion and no longer differentiate, but to accept each other as True Brothers and Sisters on Earth. This is the key to True Peace on Earth.

*[It does not matter whether you are religious or what religion you belong to. The message is to accept one another as one, as family, and to see God in everything and everyone.]*

Isaia takes shape as a religion. The word religion in its purest form means “to reconnect”. Religion in this sense is distinct from forms of “worship of God” (Dutch: “Godsdienst”, German “Gottesdienst”. which literally means “God-service”). The difference between religion and worship is that religion is focused on reconnecting with God, while worship places God outside of oneself, as something external. Isaia does not seek to worship God, but to reconnect with Him and is therefore not a form of worship and will not follow one either. Isaia can be though an addition to every form of worship, and does respect every form of worship that carries in its core the Purity and Sacredness of God.

## **The Way**

### *Love is the only way*

A soul should walk the path it feels it is meant to walk. Each door one enters provides food for the soul to learn, no matter how difficult the experience may be sometimes. After all, it is about learning to live from compassion and unconditional love, as God is, and to break through the illusion. Everyone who has not experienced Enlightenment is trapped in the web of illusion and believes that what he sees and experiences is real.

### *Create your own altar*

Before you start you create your own personal altar at home. Everyone should prepare their own altar themselves. Do not share an altar with someone else, even your partner, with the exception perhaps of your children when they are young. Design your altar in your own way. You can fill your altar with those things you feel you need – naturally, only with loving objects. Only use white candles for your altar. With white candles you bring in highest and purest energy. Your altar should be treated with respect. This means not entering your altar with outdoor footwear, and keeping your altar clean. Your altar is your physical place to connect with God and with yourself. Try to sit with your altar every morning before your day starts and every night before you go to sleep.

An altar is a physical location for people to continuously remind themselves of their connection to God. But your altar is also in yourself! So wherever you are, you carry your altar with you, because God is everywhere.

## *Entering God's Altar*

Each person has access to and the right to enter God's Altar. Your own purity and love makes it either possible or more difficult to make a pure connection with God. God always sends His helpers to assist with questions that are pure and coming from the heart. It depends on your development or your illusion/darkness how strong the connection with God is. On account of this connection assistance is sent from that level. But do not forget, miracles do happen.

Everything you now do to restore your connection with God is an advancement for your soul. Your soul lives forever. So even if it feels like progress happens slowly in one life, it is not about this life, but about your soul, which will probably spend more lives on earth. So do not postpone what you can do Now.

We can enter God's Altar in two ways. The first is in prayer, and the second is in silent prayer or meditation. You are encouraged to practise both in your life.

## *Prayer*

Every form of connecting with God is a Prayer. Prayer is a communication between you and God and therefore very personal. Depending on the prayer an answer will follow. There is always an answer, even if it is not immediately visible to the person. One should have the faith and trust that the Prayer is answered.

In your prayer you can thank God for the life He gives you and the possibility to improve your life. In prayer you can also ask God for help to resolve situations in your life, to clarify them, or to change them. God can open doors so that this change can take

place. But you are responsible for your life and everything you do. You are the one who is discovering the power of God in yourself. Therefore God will never solve it for you, but will always send the type of help that suits you.

### *Silent Meditation*

The second way is to enter silent prayer or meditation. Silent prayer is the most difficult meditation there is. By entering into silence you create the possibility that God makes contact with you, whether you are conscious of it or not. Through the silence God can give you what you need, without having to ask anything. You open yourself to God by doing His work and through the silence you are trusting that the right thing happens for you.

The difficulty of silent meditation or prayer is trying not to think of anything. You will notice many thoughts passing by. That is alright. What matters is not to get caught up in these thoughts. Just let them be there, but do not give them attention. Thoughts desire power. The ego desires power. As soon as you give them attention, you give them power and the ego has you right where it wants you. As long as you give your thoughts love rather than attention, they have no power and will disappear by themselves. This is how you slowly build up the silence in yourself. Some days it will be easier than others, but do not give up. In this silence – even if your thoughts are trying to distract you – God connects with you. Then God can communicate with you and integrate what can be integrated. This does not mean that you will hear God, but He will let you know in His unique way what His message is. His message can be a thought you share with someone or a strong feeling to undertake something. It does not

matter. He always speaks to you, remember that!

### *Breathing*

Breathing is the most important nourishment of mind and body. The air contains prana, life energy. With proper breathing you bring this prana into your body and spread it throughout your body. Proper breathing is characterized by breathing deeply into your belly. There are different breathing techniques that some practices use. In meditation we use deep abdominal breathing, very gently and as slow and gradual as possible. The belly should be soft, so that the inner breathing has access to your whole system and the prana can be absorbed throughout your body. By a good flow of prana, you come alive.

### *Strengthen your connection with God by breaking through the illusion.*

As Isaia we believe that everyone has access to all the information that is needed and that everyone follows the path as they should. There is no guideline on the path, because as mentioned before the path is between you and God only. Each door that is opened, the life choice one makes, is a door where the soul wants to learn or solve something through that experience. There the soul is made conscious of something it wants to work out. So always spread your arms and receive the lessons when you open a door. Before you enter that door and take a decision you can first go deep within and ask whether this is the path to take now. During the attunement you will go

deeper through your layers by repeating *'I let go of my own thinking and I am free to receive the answer'*. By going deeper each time the ego-layers will dissolve more and more, so that your answer will become purer. Do continue to trust your own feeling, but try to see through your ego, because your ego can confuse you with your own feeling. Naturally there are multiple ways that lead you to God. In everything you do, try to experience the clarity and purity of God. It is your path that you walk, and as God says, 'your connection with Me is unique'. And do not forget to enjoy the journey. The path is the way to Enlightenment, and therefore also to inner joy.

These are some steps to get you started on your path. Take the time that is needed to integrate a step. You do not need to follow the steps in this particular order. Follow your heart. Your devotion will bring you where you need to be.

### **Step 1**

Accept God as the one True Light of which you are part. Listen to His voice in your heart. Have faith and trust that this is so.

### **Step 2**

Reprogram old behaviours that are not according to God Consciousness.

- **Stop fighting on every level.**

Our biggest fights are the ones we have and create with ourselves. By breathing deeply and relaxing, you come to your inner feeling, and you can say to yourself 'I let go of my fight' and repeat this as long as is required.

It will happen that your environment wants to involve you in its struggle. Be aware that you are the one to allow that to happen. When you notice this happens, take a step back, take a deep

breath, and say ‘I am not participating in this fight, I breathe God in, God is my way.’

Sometimes you will notice that this is not so easy. It is a learning process. Sometimes you take two steps forward, sometimes two steps back. That is alright, as long as you keep correcting yourself and keep realizing what is happening. You are the only one who can correct yourself. So be honest with yourself, then you are also honest with the God in you.

### **Step 3**

- **Clear your energy field.**

Ask God to remove everything that is not good for you from your energy field and your life. Dare to let go, dare to give up what you may have been living on for a long time and open yourself to the new.

- **Receive**

Then ask God to bring back everything that once belonged to you, but that you have given away. Dare to receive this blessing. And feel how you slowly become whole with yourself again.

Step by step this will take place, this development depends on your own growth and will to walk the path to God in the right way. Do not forget that God is always listening.

### **Step 4**

1. In prayer: ask God to bless you
2. After this blessing: bless yourself by visualising holding your own hand above your head

### **Step 5**

Ask God to help you think and act according to His image. This is where integration of God Consciousness takes place. Reject any thought that is not according to God Consciousness. Those are thoughts that do not encompass love or compassion. Rejecting thoughts means: lovingly transforming these into

loving thoughts, so that you break through the illusion and the ego.

### **Step 6**

Realize that in the illusion everyone is a victim. Everyone who lives from the illusion and therefore from his ego, is not who he really is. Those who do harm are, like their victim, a victim. Because of the darkness that surrounds them they are not connected to light and often they create more darkness. Be aware, from this consciousness in which one lives in this illusion, it does not follow that it is permitted to do harm, but only with love can they be reprimanded – and perhaps they may experience the Light of God and discover the way to their true self.

### **Step 7**

Heal your heart if this is necessary. Everyone experiences painful events, the reason why is never completely clear. But by having faith in God your wounds will be healed, whether these wounds are karmic or not. One thing is certain, the moment you discover the truth that you are made in the image of God, these wounds will also disappear, and it will be as if they never existed. Each time you experience something, no matter what, ask God to show you the truth and why you have to experience this. The moment you are open to receiving the answer, you will receive it.

### **Step 8**

Time is an illusion. One of the first things you will learn is to walk the path to God with patience. The moment that doors open and issues are resolved is up to God. Everyone's life is complex in a way that is incomparable to someone else's. God determines this moment depending on your devotion and the degree to which you allow His Light. That means that you are supposed to take responsibility when something happens. On earth we are

measured by time, which is a creation in the illusion. The soul is eternal, which means that time does not matter. Do not hold on to time as a factor of pressure, but do what you are meant to do in the Now.

### **Step 9**

Be a servant for God. Appoint God as your chief. Then ask God what you can do on earth for humanity in a way that fits His plan. Many things will be revealed to you and the form it will take depends on your growth and purity, but you are able to give it all, because you are God's creation. You work for God and God will give you what is rightfully yours. Do not expect God to give you earthly richness, because it is in your giving that you will receive. What God will gift you cannot be seen with earthly eyes. Trust that God takes care of you in the right way, and if this means that, for instance, you have to experience a kind of poverty on earth, so be it. The truth will be revealed also to you and is not dependent on life on Earth. Life on Earth is a confusing illusion people often measure themselves by. It does not say anything about true inner happiness. Someone living in poverty could be happier than someone who is wealthy. Never forget that!

### **Step 10**

#### **Letting go**

By holding on to earthly desire we block the flow of the Godliness.

Repeat a few times: *I let go and let God lead me where I need to go.*

### **Step 11**

Follow your heart. If you feel you want to add something to these steps, feel free to do so. Be aware though that these steps are from unconditional love. You are the creator of your life.

### *Messages for on your way*

By starting to live from your heart the Kingdom of God will reveal itself in you. These are some points that you can keep in mind to come into the flow of life and therefore in the flow of the Light.

- **Take responsibility for everything in your life**

*[No one can do something to you that you did not ask for yourself. The law of karma and past lives are a major influence on our lives. Something can only change when you accept that you yourself are responsible for it. You are on your way to Enlightenment and you will encounter all that needs to be purified. By avoiding falling into the role of the victim you break the spell of the illusion.]*

- **Share everything you learn from your heart**

*[By keeping nothing for yourself you come into the flow of life and therefore in service. God gives each all that one needs and you were made in the image of God!]*

- **You are the keeper of your light, remember that!**

*[No one can take your light away, unless you allow it. Pay attention to who you associate with, do not walk away from the darkness, but shine your light in the darkness. If it is necessary, recharge in light.]*

- **Do not make an image of God**

*[God exists in everything. If you want to have an image of that, just look around you, because He is the purest and highest intelligence that encompasses all there is. God exists in everything and therefore also in you.]*

- **Live in the NOW!**

*[When your attention is too much on the future or the past, it is nearly impossible to correct yourself or ground yourself. NOW is the moment and only the NOW exists. Tomorrow is future and*

*yesterday has passed. When you do NOW what God leads you to do that will bear fruits in the future.]*

- **By giving from your heart, you will receive**

*Do not give in order to receive, because then you are fooling yourself. If you have a hard time giving because of what you have been through, heal your heart first. By healing your heart you will be able to experience God again and giving will follow naturally. Do not forget to receive what God gives you on your way.]*

- **Act from Pure Intention**

*[Your intention is very important to experience the purity of God. When your intention is, 'I do something godly so that I can have worldly success', this will most probably not fit in God's plan. Be honest with yourself about what motivates you to act and purify it. The ego is very intelligent and will try to change your mind.]*

- **Use only what you need**

*[God's force continuously creates abundance. By living in fear, our worst enemy, you block the way of the flow and therefore God's eternal source. Trust that God will give what you need and it will be given to you.]*

- **Never expect anything in return**

*[When you give, you give because you want to give and not because you want to receive something in return. God is taking care of you and will give you what you need. Have faith that this is really how it works, and do not look to someone else, because everyone's path is unique and depends on his or her karma.]*

- **Creating a World of peace starts within yourself**

*[People want peace on Earth. Peace on Earth starts with and with in you, by examining where you have conflicts. Break through these conflicts and you will radiate peace yourself. In*

*Light there is peace. Your light will shine where there is darkness. The peace will spread.]*

### *God in everyday life*

By developing the power of God in yourself, your life on earth will gain another dimension. On your way to this power you are to look at your life with purity and clarity. Along the way you will notice that Fear, belonging to the illusion, is the biggest factor to overcome. To support your insights, we will discuss a few important events in our society. We also offer personal support with these insights. We understand that it is not as easy as described in a few words.

### *Work*

You always end up in places where there is something to learn, also in terms of one's job. Work is seen as a very important aspect in society. Work provides an income that enables you to make a living and unfortunately people are very dependent on that. This dependence leads them to make choices that are not from their heart. You will notice that the more God grows in you, a trust will grow in you that will give you more inner direction that fits your soul. Giving rise to the power to change your life, take risks and have faith in that.

- The first thing that you can examine is whether you are happy at your job. If not, ask God what you can learn there. You have that job for a reason: because you chose that door, your soul made a choice to learn a lesson. In some cases it will be difficult to find this out in purity. But keep trying. Perhaps you are there because you aspired to this job, or because you can shine your light there, or because you are learning to live from compassion. Remain open for any possibility and learn what you are supposed to learn or to bring. Mostly the change or the power to change will then come naturally.

- Look whether your organisation acts from purity. When you are on the path to integrate purity and therefore God in your life, you will become more sensitive to the way in which your environment operates. Many organizations do not come from purity, but from creating profit. It is up to you what you want to do with that: change jobs or stay there. The choice is yours. Do not let yourself be led by fear, transform these fears into love.
- Work offers you the possibility to contribute to society and therefore also to the growth of the whole and yourself. Withdrawing to get to know yourself is beautiful, and it becomes more beautiful when afterwards you share that with your fellow human beings.

Eventually people will experience that it does not matter where you work when the deep peace and unconditional love in yourself grows evermore.

## *Marriage*

From the light and purity of God each connection is Holy. God sees only light and we were made in the image of God. When we view things from the truth, God, we will experience that every marriage is holy. Therefore a marriage should not be disturbed, unless this marriage does not carry the holiness it is supposed to carry. By connecting with the forces above, such as for instance your guides, you will be guided in your actions.

## *Make your marriage Holy*

Making a marriage holy requires an awakening of the couple. Both are to take their time to get to know themselves. During that time one should ideally connect to oneself in a marriage to oneself, and accept the sacredness, the God or Goddess, in the self. This is required to elevate your own vibration to the level of the God or the Goddess so that another will accept you in that vibration. Your God or Goddess celebrates you from an indescribable love. This does not mean that you will not encounter problems along the way. In your growth to a holy marriage you get to know each other and are open to one another's ideas. Through acceptance one grows to higher levels and to the creation of the holy marriage on earth.

If your marriage is not ready for this kind of openness, then try to accept your partner the way he or she is. This may mean accepting that he or she does not accept you. And ask God for help to show you the way to happiness.

Advice: communicate monthly with each other about your relationship and life. Be open to your partner and get to know each other that way. Then love really has the chance to develop and to flow.

### *Family - children*

Birth is one of the most miraculous creations on earth. Imagine how it is possible that through the merging of two miniscule cells a child grows into a miracle. Each birth is an opportunity for a soul to learn and to give on earth. Together with God souls chose the parents that are allowed to guide them in their life. We do not call it raising or upbringing, but guiding. Which direction the child should follow is between God and the child. The parent prepares the child for living on earth.

The children of our time carry messages of God with them and are called new age children. They have been blessed to spread these messages on earth. Therefore the parents of these children are not only expected to guide their child, but also to listen to their messages as if they come from God. There will also be souls that on their way to their birth are moving through heavy energies. If you notice that with your child, ask for help.

Guiding a child is not easy, unfortunately they do not come with a manual. On the other hand, this makes it quite exciting. Often guiding children is based on traditions and how the parent themselves were brought up. These are some tips to pay attention to:

- Ask how your own upbringing (often this was not a guiding) happened. Were you happy, for instance, or were you abused? If there are many painful aspects, try to heal these from your heart, if needed ask assistance with this. Try to transform old unloving patterns from your system.
- Try to pass on the beautiful things to your child with love, and exclude the bad experiences. Screaming at a child, for instance, is like shooting arrows at it. It is not just words, but also energy that moves in a direction. A

good example of this is the water cards of Masaru Emoto. The vibration of water changes to dark and ugly when you approach the water with bad words, and the vibration becomes beautiful and light when you use beautiful loving words. Everything is made up of energy and has a vibration. By being and radiating love, you also radiate this as a vibration around you.

- Never let your child go to sleep when you are angry at it. First make up with the child, so that it can sleep peacefully. That is good for you and the child. Let love always be your way and passion.
- And sometimes you have to be strict. Children will be children, even if their souls are old and wise. A child will test your limits, that is why it is the child and you are the parent.
- You invited each other to learn from each other. Stay open for what a child can bring you.
- You can only do your best, nothing more.

## *Community*

Everyone is part of the community. The path to Enlightenment requires being able to act without judgment. Without judgment does not mean approval, but you let the other walk the path they are guided to walk. It is not about wanting to improve the world, but that what one sees and experiences is the illusion. It is about people breaking through the illusion. The only one that can change you is you, by continuously looking in the mirror. What you are or are becoming is what you radiate. The more God flows through you, the more your radiance will become loving and beautiful, which will affect your environment. So try to be an example rather than a know-it-all. Each connection is there to learn from it, even if you think you are ahead of someone else. The student learns to become a Master and the Master learns not to make a distinction.

## *Politics*

Every political party is needed, because each party is an expression of the diversity of humanity. One should find a loving balance in this. Acting from purity in a political party requires a pure attunement to God – what is the right way, what is meant to happen? – and not from acting out of personal motivation. The world is in a state of change and transformation and it will continue to be like this until everyone is enlightened.

- One of the first steps is to learn to listen from the heart rather than to react from the mind, but eventually mind and heart should cooperate.
- Really learning to work together instead of competing. We are all responsible for how we represent God's creation.
- It is not a bad thing to admit when someone else is right. Purify it with each other.

## *Health*

Illness is a sign and expression of the illusion and often has a karmic cause. Every illness is an effect of not having properly and lovingly cared for oneself. When the psychological background of an illness is found, one can start to cure it. Everything is energy, illness too, and a human being who is in God-Being is able to transmute illness-energy into health-energy. Often the body should be cured by also purifying the different (invisible) bodies and karmically connected lives. You do not need to be conscious of that, just allow the pure intention to flow through it.

In meditation you can ask God to show you what you need to work on for yourself. All illness is curable and depends on the persistence and willingness to become healthy. After all, we carry God's strength within us. Realize in your inquiry into the cause of your illness at a psychological level that you need to bring the light there to break through the illusion of the illness. Remember: everything that you integrate in this life, your soul carries over as experience to a next life. It is never a waste of time. Faith makes the soul powerful and integrates the awareness that the Soul is timeless.

## **The Completion: Heaven on Earth**

When you manage to break through the illusion, you will experience that the nirvana is omnipresent. When each person on Earth realizes this consciousness, we speak of Heaven on Earth. Heaven on Earth is the paradise where one exists and lives in the Kingdom of God, because then God's true identity finds full expression:

Above and below are then one.

The duality is gone, so that we are no longer able to make distinctions.

The wheel of rebirth is broken through, the illusion perished and as Ascended Masters we will be on Earth.

A world coming from light, full of unconditional love, where the ego has no power, but is only a distant noise.

And the illusion only a distant memory.

The Realization becomes reality and Time and Space, what is that?

In deep peace one rolls with the flow of the light.

Naturally one arrives where one needs to be, because the inner struggle is over.

We will prevail because the true I AM finds its expression in BEING Always and Forever!

***Awakening from the dream***

A paradise on earth is what I dream of  
A world where we all treat each other with love  
A world where struggle is past  
A world where we realize that we are all one  
A world where we care for each other  
A world where we take care of everything that is  
A world where God reveals His true identity  
A world where ...  
I know that it exists the World  
One day my dream will come true
